

Proposal:

- Repurpose an old tablet, to take the place of the whiteboard
- Tablet in Kiosk Mode, so it can't be used for anything else.
- A single communications app with the following functions:

1. Speech-to-text technology, using a Bluetooth or connected microphone

2. Keyboard, using a Bluetooth keyboard

3. Scrolling Words

- Full Screen
- Black on White – high contrast
- Large Font
- Single line
- Tap and hold. Speak into the microphone. Words scroll across the screen
- Type on the keyboard. Words scroll across the screen
- Pause a little while or Tap the screen, or press return on the keyboard to start another stream of words.
- Drag / Throw the words backward and forward.
- Disappearing menu, adds controls for:
 - scroll speed
 - font size
 - whiteboard mode toggle
 - keyboard pairing
 - microphone pairing
 - speech on / off

4. Whiteboard

- Full Screen
- Black on White - high contrast
- Use finger to paint
- Button to clear
